CIMTs committed

Grapefruit Complex (4 fires), Upper Yukon Zone, BLM. CIMT (AK Team 3). Started on DNR land 30 miles northeast of Fairbanks, AK. Timber and hardwood litter. Active fire behavior with torching, creeping and smoldering. Numerous structures threatened. Trail closures in effect.

* Riley, Tanana Zone, BLM. CIMT (AK Team 2) mobilizing. Started on NPS land nine miles southeast of Healy, AK. Timber and hardwood litter. Active fire behavior with crowning, torching and running. Numerous structures threatened. Evacuations, area, road and trail closures in effect.

Deception Pup, Upper Yukon Zone, BLM. Started on DNR land three miles northwest of Central, AK. Timber. Minimal fire behavior with smoldering and creeping. Structures threatened. Reduction in acreage due to more accurate mapping.

Deep, Tanana Zone, BLM. Started on DNR land eight miles southwest of Lake Minchumina, AK. Timber. Active fire behavior. Residences threatened.

McDonald, Military Zone, BLM. Previously reported incident. Started on DOD land 9 miles southwest of Salcha, AK. Timber, hardwood litter and short grass. Active fire behavior with flanking, backing and group torching. Structures threatened. Last narrative report unless significant activity occurs.

American Creek, Southwest Area, Alaska DOF. Previously reported incident. Started on NPS land 25 miles northeast from King Salmon, AK. Timber and brush. Moderate fire behavior with creeping, backing and smoldering. Last narrative report unless significant activity occurs.

Gold King Creek, Fairbanks Area, Alaska DOF. Previously reported incident. Thirty-eight miles southeast of Anderson, AK. Timber, grass and hardwood litter. Extreme fire behavior with group torching, smoldering and backing. Structures threatened. Last narrative report unless significant activity occurs.

## Predictive Services Discussion:

Alaska will see a cooling trend across most of the state. The exception will be the east central interior, which is forecast to remain in the low to mid 90s. Relative humidity is forecast to be slightly higher except in the east central interior, which is forecast to be around $30 \%$. There is a chance of showers and isolated thunderstorms. For the Pacific Northwest, the Great Basin, and Northern Rockies, near normal to below normal temperatures are forecast. The Northern Rockies, the Great Basin and Four Corners area will also have a dry air mass in place, allowing for the minimum relative humidity to fall into the teens, and possibly into the single digits. There is a slight chance of showers and thunderstorms for the Rocky Mountains, with increasing chances into the Great Plains, and down the southern portion of the Continental Divide. Breezy to windy conditions are forecast for the Great Basin, higher elevations and most of Wyoming. California continues to be hot and dry, with wind gusts of 15 to 20 miles per hour. Hot, dry, and breezy conditions persist for the southern Plains. The southern US is forecast to remain hot with relative humidity above $30 \%$, with chances of showers and thunderstorms.

## National Predictive Services Outlook
