

Incident Management Situation Report
Thursday July 11, 2024 – 0730 MDT
National Preparedness Level 4

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (144 fires)
New large incidents:	8
Large fires contained:	5
Uncontained large fires:	33
CIMTs committed:	13
Type 1 IMTs committed:	3
NIMOs committed:	0

Nationally, there are 46 fires being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

Predictive Services Discussion:

Strong high pressure aloft will slowly shift eastward over the central Great Basin with widespread record-challenging heat continuing across much of the Intermountain West and expanding into the northern High Plains. Very low afternoon relative humidity of 5-20% will persist for the northern two-thirds of the Intermountain West with some locations in the Great Basin dropping into the low single digits. Breezy westerly sustained winds of 12-20 mph gusting between 20-35 mph are likely across much of eastern Oregon, the east slopes of the Sierra, northern Great Basin into western Wyoming, and near the Divide in Montana. Moisture will slowly spread a little farther north and westward in the Southwest with isolated to scattered thunderstorms turning wetter for southeast Arizona into much of New Mexico and south-central Colorado, while isolated mixed wet and dry thunderstorms are likely along the western Mogollon Rim to the Arizona Strip and along the West Slope. Isolated dry thunderstorms are also possible from the east slopes of the Sierra south of Tahoe into central Nevada, with isolated mixed wet and dry thunderstorms near and east of the Divide in Montana.

Isolated to scattered showers and thunderstorms will develop from north Texas and Oklahoma into the Great Lakes, while a weak tropical wave moving along the East Coast brings moderate to heavy rain to eastern North Carolina and Virginia. Scattered showers and thunderstorms are expected along the Gulf Coast into Florida as well. Cool and wet conditions are expected in western Alaska, with seasonable and dry weather forecast for the eastern Interior.
