## Totals

Light (106 fires)
3
1

Nationally, there are 44 fires being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

## Understanding the IMSR

## IMSR Map

On July 10, a single engine water scooper on contract with the Idaho Department of Lands crashed while assigned to the Horse Gulch fire on the Helena-Lewis and Clark NF. The pilot was fatally injured. The firefighting community expresses its condolences to the family and friends of the deceased.

## Predictive Services Discussion:

Hot, record-challenging heat will continue across much of the Intermountain West into the Front Range and into northern and central High Plains. Very low afternoon RH of $5-20 \%$ will persist for the northern two-thirds of the Intermountain. Dry and breezy westerly winds will continue across southeast Oregon into the Snake River Plain of Idaho and along the Sierra Front creating locally elevated to critical conditions. Monsoon moisture in the Southwest will continue to slowly work westward and northward, with isolated to scattered mainly wet thunderstorms for the Mogollon Rim into southeast Arizona, much of New Mexico, and south-central Colorado. Along the fringe of the westward-moving moisture, isolated to scattered mixed wet/dry thunderstorms are expected for portions of the deserts and mountains in southern California to include the San Bernadino Mountains, southern Sierra, southern/western Great Basin, Arizona Strip, and the West Slope. Isolated dry thunderstorms are possible in Wyoming and south-central Montana as well.

A tropical wave along the East Coast will continue to slowly move north-northeast with heavy rain from eastern North Carolina into southern New England. Isolated to scattered showers and thunderstorms are expected across much of the Upper/Mid-Mississippi Valley and Great Lakes, while scattered thunderstorms develop along the Gulf Coast. Breezy and generally dry trade winds will continue across Hawai'i. Some locally stronger easterly winds are possible into the lower elevations of Maui and the Big Island although RH is generally expected to remain above 45-50\%.

## National Predictive Services Outlook

## 6 Minutes for Safety:

The 6 Minutes for Safety topic of the day is Operational Briefings.
