

Incident Management Situation Report
Tuesday, June 11, 2024 – 0730 MDT
National Preparedness Level 2

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (80 fires)
New large incidents:	2
Large fires contained:	2
Uncontained large fires:	8
CIMTs committed:	1
NIMOs committed:	0

Nationally, there are four fires being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

[Understanding the IMSR](#)

[IMSR Map](#)

This report will be posted Monday through Friday at 0730 Mountain Time unless significant activity occurs.

Active Incident Resource Summary

GACC	Incidents	Cumulative Acres	Crews	Engines	Helicopters	Total Personnel	Change in Personnel
AICC	1	23,979	1	0	0	48	40

Southwest Area (PL 3)

Fire Activity and Teams Assigned Totals

New fires:	6
New large incidents:	0
Uncontained large fires:	5

Top, San Carlos Agency, BIA. Four miles northeast of Cutter, AZ. Grass and brush. Moderate fire behavior. Road closures in effect.

Bravo, Kaibab NF, USFS. Started on DOD land nine miles west of Flagstaff, AZ. Timber and light slash. Minimal fire behavior with creeping and smoldering.

Bear, Fort Apache Agency, BIA. Thirty miles southwest of Show Low, AZ. Brush and timber. Active fire behavior with single tree torching, backing and flanking. Road closures in effect. Reduction in acreage due to more accurate mapping.

Blue 2, Lincoln NF, USFS. Nine miles northwest of Ruidoso, NM. Timber, grass and brush. Minimal fire behavior. Area, road and trail closures in effect.

Sourdough, Colorado River Agency, BIA. Four miles northeast of Ehrenberg, AZ. Brush and grass. Minimal fire behavior.

Antone, Gila NF, USFS. Fifteen miles northeast of Aragon, NM. Timber and grass. Moderate fire behavior with crowning, backing and flanking. Last narrative report unless significant activity occurs.

Predictive Services Discussion:

Hot and dry conditions will prevail over much of the western United States today. Portions of the Southwest, southern California and the California Central Valley will see high temperatures reaching 100-110°F this afternoon with relative humidity in many of the same areas dropping to 6-15%. Breezy conditions will develop in Washington, east of the Cascades extending into Western Montana and the northern Great Basin. The potential for isolated mixed wet and dry thunderstorm activity remains over portions of northern New Mexico and into Colorado, east of the Continental Divide, with scattered wet thunderstorm activity forecast for the southern Great Plains. Severe thunderstorm activity is possible in parts of central Texas. Moisture from the Caribbean will bring heavy rain to southern Florida where localized areas of flash flooding are possible. Additionally, scattered showers and thunderstorms will develop over parts of the Upper Mississippi Valley and Upper Great Lakes region and the northern Atlantic Coast States.
