

Incident Management Situation Report
Friday, June 21, 2024 – 0730 MDT
National Preparedness Level 2

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (143 fires)
New large incidents:	2
Large fires contained:	2
Uncontained large fires:	15
CIMTs committed:	2
Type 1 IMTs committed:	3
NIMOs committed:	0

Nationally, there are 13 fires being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

[Understanding the IMSR](#)

[IMSR Map](#)

This report will be posted Monday through Friday at 0730 Mountain Time unless significant activity occurs.

Active Incident Resource Summary

GACC	Incidents	Cumulative Acres	Crews	Engines	Helicopters	Total Personnel	Change in Personnel

Predictive Services Discussion:

Above normal temperatures are expected across California and the northern half of the West, with low relative humidity of 5-20% from the Colorado River into central California, the central/western Great Basin, and Inland Northwest. Abundant moisture will remain across the greater Four Corners today for scattered wet thunderstorms, with heavy rain and flooding possible from the West Slope to the central New Mexico mountains. Isolated to scattered wet thunderstorms will develop east of the Divide in Montana and Wyoming, with widespread showers and thunderstorms across the Dakotas into the Upper Midwest. Cooler temperatures are forecast across the Northeast with scattered showers and thunderstorms, but above normal temperatures will continue in the Appalachians and Mid-Atlantic. Scattered showers and thunderstorms will develop along the Southeast coast, Florida, and south Texas. Above normal temperatures are likely across much of Interior and southwest Alaska, with isolated mixed wet and dry thunderstorms.
