## Predictive Services Discussion:

Above normal temperatures will continue across California into the Great Basin and northern Rockies, with breezy westerly sustained winds of $10-25 \mathrm{mph}$ and gusts $25-40 \mathrm{mph}$ amid relative humidity of $8-20 \%$ for the northeastern Great Basin and Wyoming. Cooler temperatures and lighter winds are forecast in the Northwest, but mid-level moisture may move northward in California for isolated dry thunderstorms in central California after midnight tonight. Cooler temperatures are forecast in the Mid-Atlantic, but breezy northwest winds will develop on the east side of the Appalachians to the Mid-Atlantic coast. Scattered showers and thunderstorms will continue across the Southwest, with isolated thunderstorms into the central Rockies. Showers and thunderstorms will develop across the northern Plains and Upper Midwest, where some thunderstorms will be severe. Isolated to scattered wet thunderstorms will develop near the Gulf and Southeast coasts as well. Isolated thunderstorms will develop today across southwest and south-central Alaska, while above normal temperatures continue across the state with afternoon relative humidity as low as $15 \%$ in the central and eastern Interior. Moderate trade winds will continue across Hawai'i with scattered windward showers.

National Predictive Services Outlook
