## Predictive Services Discussion:

Above normal temperatures are expected across much of the West into the central/southern Plains and Southeast. Isolated dry thunderstorms are possible over central California this morning into early afternoon, while mixed wet and dry thunderstorms develop over the eastern Sierra into western Nevada this afternoon. Isolated mixed wet and dry thunderstorms are possible after midnight tonight from northeast California into southeast Oregon and the northern Great Basin. Isolated to scattered mainly wet thunderstorms will develop over the Southwest into the Colorado Rockies. Dry conditions are forecast for much of the Appalachians to the Mid-Atlantic and Southeast, where minimum relative humidity will fall below $35 \%$, but scattered afternoon thunderstorms will develop across Florida. A cold front will bring scattered to widespread thunderstorms from eastern Kansas through the Mid-Mississippi Valley into the southern Great Lakes, with some storms likely to be severe along with areas of flooding. Temperatures will remain above normal across much of Alaska, with isolated thunderstorms across the central and eastern Interior. Moderate trade winds will continue across Hawai'i with scattered windward showers.

National Predictive Services Outlook

## 6 Minutes for Safety:

The 6 Minutes for Safety topic of the day is Valley Fever.

[^0]:    * Little Underhill Creek, Southwest Area, Alaska DOF. Twenty-nine miles west of Lime Village, AK. Timber and brush. Minimal fire behavior. Last narrative report unless significant activity occurs.
