## Predictive Services Discussion:

Scattered mixed wet and dry thunderstorms will be ongoing this morning across the Inland Northwest into the northern Great Basin, and continue into the afternoon across Washington, the northern and central Rockies, and northeastern Great Basin. Some of the thunderstorms will continue overnight across much of Utah into the northern Rockies. Drier air will move into the western Great Basin and eastern Oregon during the day and combine with gusty westerly winds to produce elevated to locally critical fire weather conditions, with breezy winds into the Columbia Basin and northern California as well. Well above normal temperatures are likely to continue across the southern Plains into the Southeast, with areas of minimum relative humidity below $35 \%$ in the Southeast. Isolated to scattered wet thunderstorms will develop in the Southwest, while showers and thunderstorms develop along a cold front in the Lower Mississippi and Ohio Valleys into the Northeast. Very warm temperatures will continue across Alaska, with isolated thunderstorms across portions of southeast Alaska and gusty southeast winds in western Alaska.

## National Predictive Services Outlook

## 6 Minutes for Safety:

The 6 Minutes for Safety topic of the day is Dude Fire (Arizona) - June 26, 1990.
