

Incident Management Situation Report
Friday, May 3, 2024 – 0730 MDT
National Preparedness Level 1

National Fire Activity (April 26, 2024 – May 2, 2024):

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (582 fires)
New large incidents:	8
Large fires contained:	9
Uncontained large fires:	2
CIMTs committed:	0
NIMOs committed:	0

Nationally, there is one fire being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

[Understanding the IMSR](#)

[IMSR Map](#)

This report will be posted every Friday at 0730 Mountain Time unless significant activity occurs.

Predictive Services Discussion:

A slow-moving cold front is forecast to move from the Lower Mississippi Valley and Great Lakes to the East Coast through Saturday with showers and thunderstorms along and ahead of the front. Another cold front will move south on the Plains this weekend, with showers and thunderstorms producing heavy rain over much of central Texas and Oklahoma, while lighter precipitation is forecast for the Mississippi Valley and central Plains, then gradually south and east to the East Coast and Southeast next week. However, much of Florida will receive little if any precipitation, with minimum relative humidity below 40% at times.

A deep, strong, and slow-moving upper low will move into the Northwest today, then through much of the West this weekend into early next week. Widespread moderate precipitation is forecast across the northern two-thirds of the West, with snow levels 4,000 to 6,000 feet, and heavier rain/snow likely in the Cascades and northern Sierra. Windy conditions will develop across much of the Intermountain West this weekend into early next week, but be mitigated by higher RH, periods of precipitation, and green-up. However, the Southwest will be considerably drier, with minimum relative humidity of 5-25% Sunday and Monday, with elevated to critical conditions likely along and east of the Divide in New Mexico. Downslope winds are forecast off the Alaska Range into portions of the Interior this weekend, with above normal temperatures.
