## Predictive Services Discussion:

Breezy and dry westerly winds will continue across much of eastern Arizona into New Mexico with widespread elevated to locally critical conditions. Dry and breezy conditions will spread into portions of eastern Utah, West Slope, and southern High Plains as well, while well above normal temperatures are forecast for southwest Texas. A Pacific storm will move into the Northwest today bringing rain, with snow above 6,000 feet, spreading into the northern Rockies tonight. Strong surface low pressure will move from Nebraska through the Upper Mississippi Valley, with heavy rain likely for much of eastern South Dakota into Minnesota. Scattered to widespread showers and thunderstorms will develop along and ahead of the cold front form the Great Lakes into eastern Oklahoma and northeast Texas. Isolated thunderstorms are forecast for Florida, otherwise the rest of the East Coast will remain dry. Warm and dry conditions are forecast for the central and eastern Interior of Alaska, with dry downslope winds off the Alaska Range for the central Interior.
