

Incident Management Situation Report
Wednesday, May 22, 2024 – 0730 MDT
National Preparedness Level 2

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (65 fires)
New large incidents:	1
Large fires contained:	0
Uncontained large fires:	5
CIMTs committed:	0
NIMOs committed:	0

Nationally, there is one fire being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

[Understanding the IMSR](#)

[IMSR Map](#)

This report will be posted Monday through Friday at 0730 Mountain Time unless significant activity occurs.

Active Incident Resource Summary

GACC	Incidents	Cumulative Acres	Crews	Engines	Helicopters	Total Personnel	Change in Personnel

Predictive Services Discussion:

West to southwesterly sustained winds of 10 to 20 mph and gusts 20 to 30 mph amid minimum relative humidity of 5-15% will develop across the southern Great Basin, Southwest, and West Slope this afternoon followed by poor overnight humidity recovery. A Pacific storm will move through the Northwest, northern Rockies, and far northern Great Basin today bringing widespread precipitation, with snow above 5,000 to 6,000 feet. Dry, northerly winds are likely to develop across portions of California tonight behind the cold front, especially across the Sacramento Valley. Showers and strong winds will continue across northern Minnesota into the northern Great Lakes, while a slow-moving cold front brings showers and thunderstorms, some severe, from central Texas through the Ohio Valley into the eastern Great Lakes. Hot temperatures near or exceeding 100°F will continue across southwest Texas, while isolated thunderstorms continue across South Florida.
