Nationally, there is one fire being managed under a strategy other than full suppression.
Uncontained large fires include only fires being managed under a full suppression strategy.

## Understanding the IMSR

IMSR Map
This report will be posted Monday through Friday at 0730 Mountain Time unless significant activity occurs.

## Predictive Services Discussion:

Dry and breezy conditions will continue across the southern Great Basin, Southwest, and southern High Plains through the weekend, with the strongest winds and lowest relative humidity forecast across southern/eastern New Mexico and far west Texas Saturday. A Pacific storm will move through the northern half of the West, with scattered showers for much of the Northwest, central and eastern Great Basin, and central and northern Rockies. A pair of cold fronts will move from the Plains through the Mississippi Valley and into the central/southern Appalachians through the weekend with scattered to widespread showers and thunderstorms. Some of the thunderstorms will be severe, especially across eastern Kansas and Oklahoma Saturday and the Mid-Mississippi and Lower Ohio Valleys Sunday. Well above normal temperatures are forecast across southwest Texas and Florida this weekend as well. Periods of showers are likely to continue through the weekend across Alaska, while moderate trade winds and mainly windward showers are expected across Hawai'i.

## National Predictive Services Outlook

## 6 Minutes for Safety:

The 6 Minutes for Safety topic of the day is Escape Routes Part 1 (Take 5@2).
