

Incident Management Situation Report
Wednesday, May 29, 2024 – 0730 MDT
National Preparedness Level 2

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (85 fires)
New large incidents:	4
Large fires contained:	1
Uncontained large fires:	8
CIMTs committed:	2
NIMOs committed:	0

Nationally, there are four fires being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

[Understanding the IMSR](#)

[IMSR Map](#)

This report will be posted Monday through Friday at 0730 Mountain Time unless significant activity occurs.

Active Incident Resource Summary

GACC	Incidents	Cumulative Acres	Crews	Engines	Helicopters	Total Personnel	Change in Personnel

Predictive Services Discussion:

Very warm and dry conditions are forecast across the southern Great Basin and Southwest, west of the Divide, with minimum relative humidity of 5-15% followed by poor overnight recovery. Breezy westerly winds will also develop across portions of the Mogollon Rim and Gila Mountains. Hot and dry conditions are also forecast across much of the Florida peninsula where minimum relative humidity will fall below 35%. Showers and thunderstorms will develop on much of the Plains today, with isolated to scattered thunderstorms across portions of the central and northern Rockies. Dry, northerly winds will develop across the Sacramento Valley tonight, while occasional light showers continue in western Washington. Scattered showers and thunderstorms will develop across Upper Ohio Valley and Mid-Atlantic today as well along a cold front. Scattered showers will develop across much of the central and eastern Interior into portions of south-central Alaska, with isolated thunderstorms for portions of the Interior, while moderate trade winds continue for Hawai'i.
