

**Incident Management Situation Report  
Friday, November 8, 2024 – 0730 MDT  
National Preparedness Level 2**

**National Fire Activity:**

<b>Fire Activity and Teams Assigned</b>	<b>Totals</b>
Initial attack activity:	Light (72 fires)
New large incidents:	5
Large fires contained:	4
Uncontained large fires:	14
CIMTs committed:	1
Type 1 IMTs committed:	1
NIMOs committed:	1

Nationally, there are zero fires being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

[Understanding the IMSR](#)

[IMSR Map](#)

This report will be posted Monday through Friday at 0730 Mountain Time unless significant activity occurs.

## **Predictive Services Discussion:**

Lighter winds are expected across California through the weekend, with relative humidity gradually increasing over the weekend, although it will remain drier over inland California. After a dry day today, a series of Pacific storms will begin to move into the northwestern US this weekend, with the stronger storm on Sunday. Moderate to heavy precipitation, with snow in the mountains, is expected from the Cascades to the coast while light precipitation falls across the Inland Northwest to the northern Rockies. Dry and breezy westerly winds gusting to 40 mph amid relative humidity falls as low as 25% are expected today in the Mid-Atlantic and southern New England creating elevated to critical conditions. Winds will be lighter for the weekend, but very dry conditions will continue as relative humidity could drop to near or below 20%. A storm in the southern Rockies today will bring heavy snow, with moderate to heavy rain on the central and southern Plains. The storm will move east with moderate rainfall spreading into the Mississippi Valley and west slopes of the Appalachians this weekend. However, lighter precipitation is likely in the Upper Mississippi Valley, Great Lakes, and near the Southeast coast.
