Incident Management Situation Report Wednesday, November 13, 2024 – 0730 MDT National Preparedness Level 1

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (41 fires)
New large incidents:	3
Large fires contained:	2
Uncontained large fires:	8
CIMTs committed:	1
Type 1 IMTs committed:	1
NIMOs committed:	1

Nationally, there are zero fires being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

Understanding the IMSR

IMSR Map

This report will be posted every Friday at 0730 Mountain Time unless significant activity occurs.

On November 9th, a New York State wildland firefighter suffered a fatal tree strike while on the Jennings Creek incident outside of Greenport, NY. The firefighting community expresses its condolences to the family and friends of the deceased.

Active Incident Resource Summary

Predictive Services Discussion:

A cold front will move through the Mississippi Valley today, with widespread showers and scattered thunderstorms in the Lower Mississippi, Tennessee, and Ohio Valleys. Widespread light to moderate rain will fall across the Upper Mississippi Valley and Great Lakes. Mild and dry conditions amid northwesterly winds will continue across the Mid-Atlantic and southern New England creating elevated fire weather conditions. A Pacific storm will move into the Northwest during the day and into northern California, the northern Great Basin, and northern Rockies overnight. Moderate to heavy precipitation is forecast near and west of the Cascades with lighter precipitation into the northern Intermountain West. Snow levels will start near or above 6,000 feet and fall to 5,000 feet behind the cold front, with heavy snow in the higher elevations of the Cascades. Cold and dry conditions are forecast for much of Alaska, while trade winds begin to increase across Hawai'i with scattered windward showers.

National Predictive Services Outlook

6 Minutes for Safety:

The 6 Minutes for Safety topic of the day is **Base All Actions On Current And Expected Fire Behavior**.
