

**Incident Management Situation Report
Friday, November 22, 2024 – 0730 MDT
National Preparedness Level 1**

National Fire Activity (November 15, 2024 – November 21, 2024):

| Fire Activity and Teams Assigned | Totals |
|---|-------------------|
| Initial attack activity: | Light (257 fires) |
| New large incidents: | 5 |
| Large fires contained: | 4 |
| Uncontained large fires: | 5 |

Nationally, there are zero fires being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

Eastern Area (PL 2)

Fire Activity and Teams Assigned

Totals

New fires: 67
 New large incidents: 3
 Uncontained large fires: 5

* **Jennings Creek**, New York State Department of Environmental Conservation. One mile southeast of Sterling Forest, NY. Timber. Minimal fire behavior with creeping and smoldering. Area closures in effect. Precipitation occurred over the fire area yesterday.

* **Butternut**, Massachusetts Bureau of Forest Fire Control. Two miles southeast of Great Barrington, MA. Hardwood litter. Minimal fire behavior with creeping and smoldering. Precipitation occurred over the fire area yesterday.

* **Thomas Road**, Massachusetts Bureau of Forest Fire Control. Two miles southwest of Boxford, MA. Hardwood litter and brush. Minimal fire behavior with smoldering. Precipitation occurred over the fire area yesterday.

Mount Gilead, Massachusetts Bureau of Forest Fire Control. Started on private land four miles east of Wakefield, MA. Timber and brush. Minimal fire behavior with creeping and smoldering. Residences threatened. Precipitation occurred over the fire area yesterday.

Old Forest, Massachusetts Bureau of Forest Fire Control. Two miles southwest of Boxford, MA. Hardwood litter and brush. Minimal fire behavior with smoldering. Precipitation occurred over the fire area yesterday.

Predictive Services Discussion:

A strong atmospheric river will continue to affect California into the northern Rockies through tomorrow, before weakening and sagging southward this weekend through early next week. Heavy precipitation will continue in northern California with areas of flooding, with light to moderate precipitation elsewhere across the West, focused on the northern half of the West through Saturday before sagging southward Sunday and Monday. Snow levels will begin high and above 7,000 feet before gradually falling from north to south Saturday through Monday. Drier weather and near to below normal temperatures are expected across much of the West mid to late next week, but areas of precipitation remain possible in the northern Rockies, and portions of Washington, mainly falling as snow.

A Nor'easter will bring continued precipitation to the Northeast today, with snow most likely on the northwestern side of the precipitation shield. Precipitation will wind down Saturday as the storm weakens and moves off to the east. Otherwise, generally dry conditions are expected across the Plains to the East Coast this weekend into early next week. Another storm will move west to east mid to late next week from the Plains to the coast, but precipitation is most likely in the Lower/Mid-Mississippi Valley to the Ohio Valley, central Appalachians, and Northeast. Dry conditions are likely to persist across the southern Plains and much of the Southeast, with the driest conditions in South Texas.
