Incident Management Situation Report Monday, October 28, 2024 – 0730 MDT National Preparedness Level 3

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (63 fires)
New large incidents:	1
Large fires contained:	0
Uncontained large fires:	11
CIMTs committed:	6
NIMOs committed:	1

Nationally, there are two fires being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

Understanding the IMSR

IMSR Map

One fire suppression crew from Saskatchewan, Canada is supporting fire suppression efforts in the Great Basin Area.

Southern Area (PL 3)

Fire Activity and Teams Assigned	Totals
New fires:	15
New large incidents:	0
Uncontained large fires:	2
CIMTs committed:	2
NIMOs committed:	1

NIMO Team 1 has been mobilized to assist Disaster Recovery Staff with organizing a safe, efficient and orderly transition from response to recovery in all hurricane impacted areas across the Southern Region.

Hurricane Helene Support – NC, North Carolina Forest Service. CIMT (NC State). Primary mission is to coordinate emergency road clearing efforts, perform damage assessments and deliver commodities throughout western North Carolina.

Rush, Wichita Mountains National Wildlife Refuge, FWS. CIMT (SA Team 1). Fifteen miles northwest of Lawton, OK. Timber, grass and brush. Active fire behavior with flanking and backing. Numerous structures threatened. Area, road and trail closures in effect.

Low Water, Oklahoma DOF. Eight miles west of Jay, OK. Hardwood litter. No new information. Last report unless new information is received.

Disclaimer: Changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

The majority of the country will continue to experience dry and unseasonably warm conditions today, with cooler temperatures are expected over the northwestern and northeastern tiers of the Lower 48 states. Above normal temperatures will prevail across southern Arizona into southern New Mexico, the Southern and Central Plains, Mid and Lower Mississippi Valley, and the Gulf Coast states. Showers are expected to continue across portions of Oregon and Washington, northern California, northern Idaho, and western Montana. A few rain or snow showers are also possible over the northern tier of New England. Minimum humidity levels in the teens are expected across much of the Southwest into the High Plains. Minimum humidity levels in the 20s and 30s are forecast over the Plain as well as the eastern Great Lakes, northern Ohio Valley, parts of the Mid-Atlantic States, and the central and southeastern portions of New England. Strong south to southwest winds will combine with above normal temperatures to elevate fire potential across portions of the Southwest, Central and Southern Plains, and the western Mid-Mississippi Valley Monday afternoon into Monday evening. Moderate significant fire potential will continue for parts of the Northern Rockies, the north central tier of the Rocky Mountains, the southwestern half of Arizona, parts of the western and central tiers of the Southern Area, the southwestern, central and northeastern tiers of the Great Lakes, and the southern and eastern tiers of the Eastern Area.

National Predictive Services Outlook

6 Minutes for Safety:

The 6 Minutes for Safety topic of the day is <u>Fire Shelter Deployment Site Selection</u>.
