Predictive Services Discussion:

An upper-level low will move through the northern Rockies today, with isolated mixed wet and dry thunderstorms moving from northeast Oregon into central Idaho this morning. Isolated to scattered mixed wet and dry thunderstorms will develop this afternoon from east-central Idaho into much of Montana, Wyoming, Utah, and Colorado. Breezy and dry westerly winds creating elevated conditions are likely across eastern Nevada, northwest Utah, and the Snake River Plain into Wyoming, with dry southerly winds on portions of the central Plains. Very low relative humidity as low as 5% will return to much of Nevada, northern California, southeast Oregon, and southern Idaho, with poor overnight recovery of 15-35% for mid-slopes and ridges.

The Southwest will continue to be drier due to a break in the monsoon, with the driest conditions in southeast California and Arizona as relative humidity falls into the single digits and teens. Widespread showers and thunderstorms will continue across much of Texas today, with more isolated showers and thunderstorms in the Lower Mississippi Valley. Cool but very dry air will continue to spread across the Midwest into the Appalachians, with the driest air in the Upper Ohio Valley as relative humidity falls as low as 20%.
