

**Incident Management Situation Report
Friday February 14, 2025 – 0730 MDT
National Preparedness Level 1**

National Fire Activity (February 7, 2025 – February 13, 2025):

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (460 fires)
New large incidents:	5
Large fires contained:	3
Uncontained large fires:	2
CIMTs committed:	0
Type 1 IMTs committed:	0
NIMOs committed:	0

Nationally, there are zero fires being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

[Understanding the IMSR](#)

[IMSR Map](#)

This report will be posted every Friday at 0730 Mountain Time unless significant activity occurs.

TOTAL FIRES:		135	26	16	7	3,223	221	3,628
TOTAL ACRES:		2,853	350	948	284	58,364	24,344	87,142

Ten Year Average	Quantity
Fires (2015 – 2024 as of today)	2,926
Acres (2015 – 2024 as of today)	54,087

Cumulative acres showing in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

A Pacific storm will continue to move through the Intermountain West today with rain and mountain snow, locally heavy. Breezy westerly winds will develop across southern New Mexico into far West Texas creating elevated fire weather conditions. As the storm moves eastward this weekend, widespread precipitation will develop from the eastern Plains to the East Coast, falling as snow from Kansas and Missouri into the Great Lakes, upstate New York, and northern New England. Severe thunderstorms are also likely in the Deep South on Saturday. Another Pacific storm will move through the northern half of the West Sunday into Monday with valley rain and mountain snow. The storm will then move toward the Gulf Coast and off the East Coast early to mid-next week, with rain across much of Texas to the Southeast, with snow on the northern periphery from the Ohio Valley to the Mid-Atlantic and Northeast. Very cold Arctic air will get pulled southward behind the associated cold front, with widespread below zero temperatures across the central and northern Plains and Midwest. Another Pacific storm will move into the northern half of the West late next week, while the southern half of the West is likely to remain dry with occasional westerly breezes.
