Cumulative acres showing in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Moderate Santa Ana winds of 15-30 mph with gusts of 30-60 mph will continue today and tonight across southern California. Minimum relative humidity will fall to 5-15%, with poor overnight recovery below 30% expected tonight. A weakening storm will move through the Great Lakes with light snow, and light snow showers will continue in the Rockies, as well. Weak low pressure will form near the northwestern Gulf Coast today and move east along the northern Gulf Coast tonight, bringing light to moderate rainfall near the coast. Cold and breezy north to northwesterly winds are expected on the Plains today, bringing a return to below normal temperatures. The Northwest and Northeast will remain dry today. A strong storm in the Gulf of Alaska will bring strong winds to south-central Alaska and the central and eastern Interior, with heavy rain along the south coast and lower elevations south of the Alaska Range. Another storm will bring heavy snow to much of western Alaska.
