

**Incident Management Situation Report
Friday, January 17, 2025 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (41 fires)
New large incidents:	0
Large fires contained:	1
Uncontained large fires:	3
CIMTs committed:	1
Type 1 IMTs committed:	2
NIMOs committed:	0

Nationally, there are zero fires being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

[Understanding the IMSR](#)

[IMSR Map](#)

Eight MAFFS C-130 airtankers and support personnel have been deployed to Port Hueneme, CA to support wildland fire operations in southern California. Their respective units are as follows: 153rd Airlift Wing (WY Air National Guard), 302nd Airlift Wing (CO Air Force Reserve), 146th Airlift Wing (CA Air National Guard), and 152nd Airlift Wing (NV Air National Guard).

Two crews and two overhead personnel from Alberta, Canada, and one crew and one overhead personnel from British Columbia, Canada have been deployed to southern California to assist with wildland fire operations.

This report will be posted Monday - Friday at 0730 Mountain Time unless significant activity occurs.

Active Incident Resource Summary

GACC	Incidents	Cumulative Acres	Crews	Engines	Helicopters	Total Personnel	Change in Personnel

TOTAL FIRES:		25	4	3	1	776	50	859
TOTAL ACRES:		1,742	2	4	18	29,999	346	32,111

Ten Year Average	Quantity
Fires (2015 – 2024 as of today)	501
Acres (2015 – 2024 as of today)	6,929

Cumulative acres showing in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Onshore flow is forecast across southern California today, with cooler temperatures and higher relative humidity. A strong cold front will move southward through the Rockies and Plains today, with light snow in the Rockies to the adjacent High Plains. Strong westerly winds of 20-40 mph with gusts to 60 mph amid relative humidity as low as 15% will develop today ahead of the front across much of New Mexico and West Texas. As the cold front moves into the Mississippi Valley this afternoon, more widespread precipitation will develop ahead of the front from East Texas and the Lower Mississippi Valley into the Lower Ohio Valley and Great Lakes. Most precipitation will fall as rain, but mixed precipitation and snow will fall in the Great Lakes. The cold front will move east overnight, with precipitation spreading into the Appalachians and Southeast, with mixed precipitation in the central Appalachians. A warming trend is forecast across much of Interior Alaska, with strong downslope winds north of the Alaska Range, while rain and snow spread across western Alaska.
