

**Incident Management Situation Report
Saturday, January 18, 2025 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (35 fires)
New large incidents:	1
Large fires contained:	0
Uncontained large fires:	4
CIMTs committed:	1
Type 1 IMTs committed:	2
NIMOs committed:	0

Nationally, there are zero fires being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

[Understanding the IMSR](#)

[IMSR Map](#)

Eight MAFFS C-130 airtankers and support personnel have been deployed to Port Hueneme, CA to support wildland fire operations in southern California. Their respective units are as follows: 153rd Airlift Wing (WY Air National Guard), 302nd Airlift Wing (CO Air Force Reserve), 146th Airlift Wing (CA Air National Guard), and 152nd Airlift Wing (NV Air National Guard).

Two crews and two overhead personnel from Alberta, Canada, and one crew and one overhead personnel from British Columbia, Canada have been deployed to southern California to assist with wildland fire operations.

This report will be posted Monday - Friday at 0730 Mountain Time unless significant activity occurs.

Active Incident Resource Summary

GACC	Incidents	Cumulative Acres	Crews	Engines	Helicopters	Total Personnel	Change in Personnel

TOTAL ACRES:		1,749	2	4	18	32,315	363	34,452

Ten Year Average	Quantity
Fires (2015 – 2024 as of today)	600
Acres (2015 – 2024 as of today)	7,884

Cumulative acres showing in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Onshore flow will continue across southern California today, with cooler temperatures, higher relative humidity, and areas of morning fog. Dry weather will continue for the West Coast, while scattered snow showers continue in the central and southern Rockies to the adjacent High Plains. A strong cold front will move eastward from south Texas, Mid-Mississippi Valley, and Great Lakes to near the East Coast overnight. Much colder, polar air behind the front will much of the country from the Continental Divide to the Appalachians. Widespread precipitation will fall ahead of the front from the northern Gulf Coast into the Southeast, Appalachians, and Mid-Atlantic, mainly as rain, with mixed precipitation in the central Appalachians to the Northeast. A strong storm will move into the Gulf of Alaska, with heavy precipitation along the south coast of Alaska, with mixed precipitation in southwest Alaska, and areas of heavy snow for the Seward Peninsula and western Brooks Range. Strong southerly downslope Chinook winds gusting to 60 mph will affect portions of the central and eastern Interior north of the Alaska Range. A drier, more stable airmass will move over Hawai'i today with moderate trade winds resuming.
