Cumulative acres showing in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Moderate to strong northeasterly Santa Ana winds of 20-40 mph gusting to 60 mph will continue across southern California into the evening before weakening overnight as gusts fall to 30-40 mph. Dry conditions will continue across the rest of the West, with strong valley inversions. Very cold air will continue across the Great Lakes and Northeast, with below normal temperatures southward to the Gulf Coast, while temperatures begin to moderate in the central and northern Plains as a warm front moves through with light snowfall. A winter storm will move through the Gulf of Mexico, with snow from East Texas into the Southeast and rain in Florida. Lake effect snow will continue downwind of the Great Lakes, with the heaviest snow downwind of Lake Ontario. A strong storm will bring heavy snow to southwest Alaska into the western Interior, while rain spreads along the south coast. Dry conditions will continue across Hawai'i under light to moderate trade winds.
