Cumulative acres showing in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Northeasterly Santa Ana winds will gust up to 70 mph across southern California through mid-afternoon amid very low afternoon relative humidity of 2-10%. Winds will gradually decrease overnight, but humidity recovery will remain poor. Very dry conditions will continue across much of the Southwest, as well, while a cold front moves south into the northern Rockies tonight with light to moderate snow. A weak cold front will bring light snow to the Great Lakes, while much of the southern Plains, Southeast, and Northeast remain dry with warmer temperatures. A strong storm will move into western Alaska today with rain, snow, and strong winds, while above normal temperatures continue across the rest of the state. A cold front will dissipate over the Big Island of Hawai'i today. Showers are expected for the Big Island while sea breezes and drier conditions are forecast for the rest of the islands.
